

HAO PRIVATE CLOUD

Gain Flexibility with a Reliable, High Performance Private Cloud

Since 2013, our High-Availability Offsite Private Cloud has provided businesses with the reliability and performance of a private cloud, with the control and confidence of an on-premise data center.

Fast Networking and High Performance Storage.

A dedicated team of engineers maintain and react to alerts and proactively resolve issues to reduce disruption to your network and data performance.

Security.

The private cloud uses threat intelligence and vulnerability management to provide advanced host and network protection. DDoS Protection, Zero-day Threat Monitoring, Intrusion Detection and Prevention Systems, Endpoint Detection and Response managed by a dedicated security team.

Business Continuity.

The private cloud is built on a fully redundant enterprise-grade hardware with automatic fail over to ensure uptime for business-critical workflows. Redundant independent internet and power supports the high-availability platform. The environment includes secure data protection and granular backup with multi-location restoration capabilities.

Reliable.

You can expect minimal downtime, with scheduled maintenance to servers and systems.

Sized to Fit Your Needs.

Purchase only what you need and scale as you grow without adding additional hardware.

Monitored 24x7.

Your entire virtual data center is continually monitored for software, hardware and platform performance.

White-glove migrations.

A dedicated team to manage your migration at a fixed project price.

Is Your Business Ready for a Change?

Do You:

- Prefer On-Premise servers but suffer from downtimes due to outages of power, internet, etc?
- Need to purchase a new server?
- Need to purchase a new backup solution?
- Need a second location for server(s)?
- Need increased security for server(s)?

- Want to run multi-tenant server(s)?
- Increase remote workforce?
- Build or move to new office?
- Want to run a hybrid data center (onsite/offsite)?
- Have older On-Premise application(s)?
- Reduce in-house IT support?

If the answer is YES, see if a private cloud solution with superior protection, performance and control is right for you.
