

CLOUD BUSINESS APP SECURITY

Microsoft, Google and AWS cloud security feature implementation and configuration are critical to securing the data and protecting systems. Recurring assessments of changes, security feature functionality, and operational metrics provide the information needed to make sound security or operational decisions based on potential risk.

ENGAGE THE SECURITY TEAM

- Evaluation of configured security features available in Azure, Microsoft 365, Google Workspace, and AWS
- Assessment Findings Review
- Recent Security Events Review
- Recommendations to strengthen security posture
- Provide evidence of security implementations
- Use of Advanced Security Tools for Continuous Monitoring, Reporting and Alerting

TAKE ACTION

PREVENT

Layers of Protection Built Into AME's Core Services
Security Awareness Training for your Employees

MONITOR

Recurring Cloud App Security Assessment
Security Information and Event Monitoring (SIEM)
Continuous Monitoring 24/7/365

RESPOND

Triage of Security Alerts and Reported Incidents
Priority Alerts Responded to 24/7/365

REPAIR

Recommendations by Security Team
Remediation by Service Team

STOP THREATS BEFORE THEY TAKE DOWN YOUR BUSINESS

New Global Admins
Permission Changes
Abnormal File Uploads / Downloads
Users Signing in from Unusual Locations
Third Party Access & Permissions
Changes to Mail Flow
Sharing Files with External Users
Inactivating Users
Implement New Security Features Available

WHAT IS MONITORED IN M365?

Email
SharePoint
Teams
Azure Active Directory

WHAT DOES SECURITY POSTURE MEAN?

Your business' level of maturity when it comes to security.

SECURITY INFORMATION & EVENT MONITORING

SIEM is the cornerstone of threat detection practices. Log collection from multiple sources, network traffic analysis, and system events are aggregated and used to conduct threat hunting.

DEDICATED SECURITY TEAM

The AME Group delivers managed IT services independently of the managed security services team. The security team has advanced security training and is independent of the service team. All AME staff are employees directly and services are not outsourced.
